</table>

¹Separate anatomy/physiology courses or combined anatomy and physiology I, II courses are acceptable. ²¹ semester or 1 quarter of immunology (w/o lab) is required. ²Combined anatomy/physiology lecture or separate courses are 5/R. ³Trigonometry is required either as part of calculus, or as a separate high school or college course. ⁴One course in biochem can substitute for one course of either general or organic chemistry. ⁵More than one course may be required in order to cover complete content. Physiology must be intermediate level. Students must submit physiology syllabus/syllabi. ⁶Organic chemistry- standard one-year course or one course organic chemistry combined with one course biochemistry. ⁷One sem. of organic chemistry I and one sem of organic chemistry II or biochem or molecular bio required. ⁸Molecular biology can substitute for biochem. ⁹Eight hours of advanced human biological sciences can be substituted for the anatomy and physiology requirement. ¹⁰Two sem gen chemistry and one sem org chemistry are required. ¹¹Bacteriology can substitute for microbiology.

$qtr = quarter; \ sem = semester; \ Rec = Recommended; \ SR = Strongly Recommended$
