

ASSOCIATION OF SCHOOLS AND COLLEGES OF OPTOMETRY
GENERAL AND SCHOOL-SPECIFIC PREREQUISITES
 Updated May 2016

GENERAL REQUIREMENTS for most optometry programs include at least one year of Biology or Zoology, General Chemistry, General Physics, English and College Math. Contact the schools or colleges directly by visiting their websites to confirm prerequisite courses and to learn whether AP credits and/or on-line credits are accepted to complete prerequisites.

¹Separate anatomy/physiology courses or combined anatomy and physiology I, II courses are acceptable. ²One semester or one quarter of immunology (w/o lab) is required. ³Beginning with the class entering fall 2018, we will require one sem or 1 qtr of Human Anatomy and 1 sem or 1 qtr of Human Physiology (combined A&P course must be at least 5 sem units). A lab is not required. ⁴ If a combined anatomy/physiology course is not taken, separate courses in anatomy and physiology must be taken.

⁵Trigonometry is required either as part of calculus, or as a separate high school or college course. ⁶One course in biochem can substitute for one course of either general or organic chemistry. ⁷More than one course may be required in order to cover complete content. ⁸Organic chemistry – standard one year course sequence with lab or one semester of organic chemistry with lab combined with one semester of biochemistry with lab if one is offered. ⁹One semester of calculus will fulfill one year college math requirement. ¹⁰One semester of organic chemistry I with lab and one semester of organic chemistry II with lab are required. Biochem or molecular biology (lab highly recommended) may substitute for organic chemistry II. ¹¹Molecular biology can substitute for biochem. ¹²Bacteriology can substitute for microbiology. ¹³Eight hours of advanced human biological sciences are required; junior or senior-level anatomy or physiology is strongly recommended. ¹⁴Two semesters gen chemistry and one semester org chemistry are required.
