(continued on following page)

**Regular** - Students who are currently enrolled in each class leading to the O.D. degree and taking a full-time course load. **Repeat** - Students who were previously enrolled as a regular student and did not advance to the next class. For example, a student in a second year of attendance but who is repeating enough first-year courses to be considered part of the first-year class is a repeat student. Repeat students are taking a sufficient number of credit hours to be considered a full-time student. A repeat student is not a student who was suspended and, after re-application, admitted again as a regular student. **Transfer** - Students who have enrolled after first attending another institution of optometry and leaving in good academic standing. **Dismissed/Voluntarily Discontinued** (Transfer After Dismissed/Voluntarily Discontinued) - Students who have enrolled after first attending another optometry institution where they were dismissed or left because of academic and/or disciplinary reasons.

**Alternate and Special Programs for the O.D. Degree, AY 2023-2024**

	Descriptions of all special or alternative programs leading to the OD degree:
IUSO	The Indiana University School of Optometry offers <b>Advanced Placement into the OD program</b> for individuals who have graduated from an accredited international optometry program, or who have graduated with an international medical degree. This program allows candidates to earn a Doctor of Optometry by giving them the opportunity to test out of didactic and clinical courses. Each applicant is assessed on an individual basis and an individual study plan will be created based on each applicant's experience and test results. Successful applicants could complete the 4-year degree in as little as 3 years.
NECO	<p><b>Accelerated Optometric Degree Program</b> The Accelerated Optometric Degree Program, AODP, is an accelerated program for scientists and physicians who hold a doctoral degree in science or medicine (or equivalent experience). Applicants demonstrate high scholarship in previous graduate study, as well as a firm career commitment to optometry. The program was established in 1972 to attract highly qualified candidates who can provide unique contributions to the profession of optometry through teaching, research and clinical care. This program is designed to provide an accelerated education for qualified applicants with either an earned doctorate in one of the biological, behavioral, or physical sciences; or a doctoral-level health profession degree. Once admitted, AODP students follow an intense thirty-six month curriculum, which includes a full year of clinical rotations, engaging in full time patient care. Upon completion, graduates of the program are prepared to enter the profession in clinical practice, optometric education, or research.</p> <p><b>Advanced Standing International Program</b> Through the College's Advanced Standing International Program (ASIP), graduates of international optometry programs may be admitted with advanced standing to the doctor of optometry degree program. ASIP students have to meet the same standards as the other program students, and reach the same competency standards in clinics in order to receive the Doctor of Optometry degree. Once admitted, ASIP students follow an intense two year curriculum, which includes one year of clinical externship rotations. Course work centers on basic sciences, disease, and advanced optometry skills and concepts.</p> <p><b>MS/OD China</b> The MS/OD China Program is a unique joint degree program between Wenzhou Medical University (WMU) and the New England College of Optometry (NECO). Students who complete the program earn two degrees: the master of science and doctor of optometry degrees. The MS/OD China curriculum combines the AODP curriculum and the Master of Science degree with joint clinical externships that include six months in Boston-based rotations and six months at Wenzhou Medical University.</p>
NOVA	<p><b>The extended 5-year program</b> is for students that need a lighter course load for reasons such as being out of school for several years or family obligations. The first 2 years of the traditional program are extended to 3 years. The final 2 years of the traditional and extended programs are identical.</p> <p>Graduates of foreign schools are considered by the Committee on Admissions and the Transfer Committee for possible enrollment into a <b>3-year program</b> on a case by case basis.</p>

\*These are the tuition and fees figures that are reported directly to ASCO, but are subject to change. Applicants are strongly encouraged to speak to each institution they are applying to about available scholarship and financial aid opportunities.

\*\*Almost all out-of-state students convert to in-state before the second year. Non-U.S. citizens may not convert to in-state. For UCB: Second and third year tuition figures include Summer sessions. In the fourth year of study, many students have externships outside of California (or outside the seven Bay area counties), which allows them to qualify for In Absentia status. They receive an 85% reduction in education and registration fees for one semester while away.

\*\*\*Most UABSO non-resident students qualify for a merit scholarship decreasing non-resident tuition significantly.

\*\*\*\* Standard university fees are bundled into the cost of tuition. The fees listed in table 3.6 are additional fees that apply to Optometry specifically.

\*\*\*\*\*Tuition figures are for the traditional 4-year program only.
